To: dev@ankhsvn.open.collab.net

1. First of all. You have some way to communicate with your customers, like Issue tracker and Community support forum. I registered in <https://ankhsvn.open.collab.net>, but not have right to write my problem anywhere.

2. I have some problem to using you program:

AnkhSVN - Subversion Support for Visual Studio 2.5.12266.473

* Ankh.Package 2.5.12266.473

* Subversion 1.8.4 via SharpSvn 1.8004.2605.15365

SharpSvn is linked to: Apr 1.4.8, Apr-util 1.5.2, Cyrus Sasl 2.1.23, OpenSSL 1.0.1e 11 Feb 2013, serf 1.3.2, SQLite 3.7.17,

Subversion 1.8.4-SharpSvn-1.8.4, ZLib 1.2.8

SharpSvn is optionally linked to: Berkeley DB 4.4.20, SharpPlink 1.8004.2605.15365

My unsolvable today problem:

- I have project in Visual Studio uploaded by my partner in SVN. (this is screenshot number one). My partner working fine with project and have 333 check of your code.

- I have exactly the same version of AnkhSVN, and exactly the same version of Visual Studio, and commonly all of my environment is clone of my partner. But I not can unload project from SVN to my Visual Studio.

- I trying all variants in fourth screen. You program is begin working, see screen number five.

- And after small time flash me error.

SharpSvn.SvnObstructedException:

'Arenda_5.sln' is not valid as filename in directory 'G:\Projects\All_Votpusk\Arenda-Mobile'

at Ankh.Commands.OpenFromSubversion.<c__DisplayClassc.<CheckoutAndOpenSolution>b__b(Object sender, ProgressWorkerArgs ee)

at Ankh.ProgressRunnerService.ProgressRunner.Run(Object arg)

svn-version=1.8.4

os-version=6.0.6002.131072

ankh-version=2.5.12266.473

sharpsvn-version=1.8004.2605.15365

command=FileSccOpenFromSubversion

vs-version=10.0.40219.1

Why? How I may solve this problem?

Tkank you,
with expect you answer,
Viacheslav
