Work Experience

Dates	**February 2016 - till now**
Occupation or position held	Programmer and system administrator
Main activities and responsibilities	Now I searching new big projects and now I working only as freelancer in various small projects - 20 of them I was described in page in various small projects - 20 of them I was described in page http://www.vb-net.com/FreelanceProjects/index.htm (ukrainians languages). And I write many another program in this year, for example: (1) on Bla-Bla-Car Rest API - http://www.vb-net.com/BlaBlaCar/index.htm (2) on MongoDB and Google API - http://www.vb-net.com/MongoDB/index.htm (3) parsers http://www.vb-net.com/FreelanceParser/index.htm (4) tests applications http://www.vb-net.com/EmployerTests/index.htm and many-many another small program.
Name of employer	Small frelancers projects
Location	anywhere in the world
Type of business or sector	Other
Dates	**September 2015 - February 2016**
Occupation or position held	Project manager and senior developer
Main activities and responsibilities	This project was created to election of bulgarian political party and should improve propaganda this party's idea. Clearly this is a site with live streaming video from street (like ustream.tv, livestream.com, vimeo.com) - but without to moderation from this alien company and payment to this alien company. There are a bit of programming in this project, but I have done full configurations of clear bare metal servers and bare metal firewalls (I like ZyWall andI was selecting this firewall on all my projects, where I should select bare metal firewall), include stream-server (I select Wowsa server), web server, SQL-server, Subversion server and other servers, needed for this project. I had installed servers in datacenter (my liked datacenter company - itldc.com, it's ukrainians company, that has datacenters in many country in the world). I installed web-cameras on clients (I select basic camera to project - Hikvision, but project support for translation live stream anything modern communicator on Android). Also I was editing video and was doing all any task in this projects. After finished election process this project is frozen. More details about this project please see on page http://www.vb-net.com/desen/ (ukrainian languages)
Name of employer	project Desen.bg
Location	Bulgaria
Type of business or sector	Human Resources

Dates	**January 2015 - September 2015**
Occupation or position held	Project manager and senior developer (ASP NET MVC site and Windows application)
Main activities and responsibilities	Special site with this company and windows application. This is socail network system, end goal of this network community is printed in paper calendar of events for each community. Adversting inserting in calendar of community events, calendar printing and spreading. This MVC site written in my own CMS, that provide many levels user right. Ordinary users may adding to site future events with fotos to their community. Moderator of community combine events to community's calendar. Editor community is windows applications create PDF-schema for print calendar in typography in high repolutions and for publish on this site in low resolution. Some screens of this projects please see in page http://www.vb-net.com/ASP-NET-MVC-CMS/index.htm This my own CMS include special caching of site entering page, described in this page http://www.vb-net.com/CacheEnterPage/index.htm and my special graphics engine, that save image in DB, describing in this page http://www.vb-net.com/Multipart-form-data/index.htm More details of technology used on this projects please see in page http://www.vb-net.com/MVC/ , screen on windows application (PDF schema editor see in page http://www.vb-net.com/PDF-Constructor/index.htm). Resume of this my job please see in http://www.vb-net.com/wanted/Panorama.gif Project worked perfectly, but, as I understand, owner of this project has not got a big profit and after small time project was closed.
