Senior Asp.net Developer and .NET developer

I'm dot net developer, I write in .NET ASP.NET since 2002 year, since dot net technolgy was born. Since then I have pass all MS technology stack and now I write in NET Core 3.1
http://www.vb-net.com/2020/Index.htm

One of the my first biggest site, I write it in 2004 year, is still alive votpusk dot ru This project I've created as team lead.

One of the last my biggest site is England online store, like amazon.com, it named giftrepublic.com
This site was present before me, but in 2017 I have done full refactoring of this site, with creating all asp dot net code from the same begining, and only database has been saved from old project.

Between this two projects there was dozens of other sites I have writing. One of the my last sites is nuclear of Podio.com, this is difficult multithreading environment in .NET Core. See please full list below.

In can use both of dot net languages - C# and VB.NET, but prefer VB syntax. I can use any kind of ASP.NET technology from ASP.NET Classic and ASP.NET MVC to ASP.NET Core 3.1. In server side I can use any type of SQL Server, in client side I usually use jQuery and now try to use Blazor.

Also for my career I has write many-many various desktop applications on .NET, please see list below.

I can anticipate future software changes and never will write redundant code, customer satisfaction is my main goal. I never use new technology from Microsoft without seriously reason. Also I never give up my projects and my customers.

See, please, screencast of my real working
