(3) Parsers https://www.vb-net.com/FreelanceParser/Index.htm

September 2015 - February 2016

Project manager and senior developer
Name of employer: Desen.bg
Location Bulgaria
This project was created to the election of Bulgarian political party and should improve propaganda
this party's idea. Clearly this is a site with live streaming video from the street (like ustream.tv,
livestream.com, vimeo.com) - but without to moderation from this company.
I did full configurations of clear bare metal servers and bare metal firewalls with ZyWall
Stream-server Wowsa
Web server, SQL-server, Subversion server
Installed web-cameras on clients - Hikvision on Android).
More details: https://www.vb-net.com/Desen/Index.htm

January 2015 - September 2015

Project manager and senior developer (ASP NET MVC site and Windows application)
Name of employer OCMR Toronto
Location Canada
Building a site and windows application. This is social network system, the end goal of this network
community is printed in the paper calendar of events for each community. Advertising inserting in
the calendar of community events, calendar printing and spreading.
This MVC site is written in my own CMS, which provide many levels user right. Ordinary users may
be adding to site future events with photos to their community. Moderator of community combine
events to the community's calendar.
Editor community is windows applications create PDF-schema for print calendar in typography in
high resolution and for publication on this site in low resolution.
Some screens of this projects please see in page https://www.vb-net.com/ASP-NET-MVC-
CMS/index.htm
This my own CMS include special caching of site entering page, described in this page
https://www.vb-net.com/CacheEnterPage/index.htm
graphics engine, that save image in DB, describing in this page https://www.vb-net.com/Multipart-
formdata/ index.htm
More details see in page https://www.vb-net.com/MVC/
Screen on windows application see in page https://www.vb-net.com/PDF-Constructor/Index.htm
Project worked perfectly, but, as I understand, the owner of this project has not got a big profit
and after small-time project was closed.

January 2010 - April 2013

Project manager and senior developer (ASP.NET classic, SOAP-WSDL services, FLEX, SQL and System Administrator)
Name of employer FlySeason.ru
Location Moscow
Type of business or sector Aviation, airport, airline
Main activities and responsibilities
This is a project of Avia ticket sales from client sites, distributor of this company. Some screen for project management timeline please see in screen -
https://www.vb-net.com/FlyProject/FlyProject.htm
Over central DB, that saved viaticket, I build SOAP-WSDL server
Over SOAP-WSDL services I build many clients application, that will be including on client site, that sales ticket. It's a special calendar, that showing free via ticket. Site has great administration panel for enrol process of ticket sales (from first interesting client of air transfer to print electronic ticket). Project has many cryptography to hide sensitive client data, for example see page -
https://www.vb-net.com/Flame/Index.htm

September 2007 - July 2009

ASP.NET developer
Name of employer Payment kiosk and bank company Gisis.ru
Location Moscow
Type of business or sector Banks and credit
This company is a bank, which has network of kiosk payment system. In this company I work as only a simple developer (ASP.NET programmer for Web and windows). I create kiosk payment application. Accent on transmission of banking information, security of information, big data on MS SQL Server. Some of my notes for this job see in page
In this job I have learned how to build big network kiosk system and after that I created another network as project manager.

October 2006 - December 2016

Senior developer
(ASP.NET, Win, FLEX, SQL - developer. SQL, Network and System Administrator)
Name of employer internet company Votpusk.ru
Location Moscow
Type of business or sector Tourism, hotels and restaurants
Main activities and responsibilities
This is my biggest project, what I continuously developing more than 10 years. This is one of the biggest Russian internet resource, I am not only programmer of this project, I had created all information infrastructure in this company, including installing server on hosting. This project was built on ASP.NET and ASP.NET MVC technology (Visual Basic). This project has may be a one million string of source code. High load (millions clients on month). I'm administrator of all servers of this resources (8 unit on VMware - Linux, Windows servers and bare metal firewalls).
This work continuing at this time with small loading - some hour in month.

2006-1990

VB6 programmer, System administrator
Various company in Ukraine and Russia, for example see https://www.vb-net.com/Iile/Index.htm
https://www.vb-net.com/Wanted/SvSity.gif
